The U.S. Congressional Serial Set, commonly referred to as the Serial Set, contains the House and Senate Documents and the House and Senate Reports bound by session of Congress. It began publication with the 15th Congress, 1st Session (1817). In general, it includes: committee reports related to bills and other matters, presidential communications to Congress, treaty materials, certain executive department publications, and certain non-governmental publications. Although congressional in name, there are thousands of executive branch publications included in the older, historical portion of the series. It is this rich combination of legislative and executive publications that accounts for its tremendous value as a primary source for American history.

For a history and explanation of the Serial Set, see:
